

Craftex Product Specification Sheet

CATALYST

A neutral pH carpet cleaner which cleans, deodorises, disinfects and dries carpets, with built-in protector to make maintenance easier. For use with a thermal rotary machine.

Carpets are dry within an hour, soft to touch with a pleasant natural orange fragrance and disinfected to hospital standards. Also an excellent pre-spray for the bonnet buffing method of carpet cleaning.

PRECAUTIONS FOR USE

Test for colour fastness. Do not use dry bonnet or allow bonnet to dry out especially on synthetic fibres. Do not breathe spray as nasal irritation may occur. Avoid extended skin contact as it may cause drying or cracking. Wear gloves for prolonged use. Wash chemicals from eyes and skin immediately with plenty of water, if ingested drink plenty of water, seek medical advice. Keep out of reach of children.

DIRECTIONS

Thoroughly vacuum carpet before cleaning. Dilute 250ml 0076 per litre of hot water. Pre-spray soiled areas and brush in with a pile brush. Soak thin bonnet pad in the solution and wring out until almost dry. Start on the most soiled area of the carpet using a heated rotary machine, quickly pass the pad over the first 10 to 15m² to spread the moisture and avoid overwetting. Continue until clean and almost dry (use caution on polypropylene and synthetic fibres as they may melt). Use a fresh pad every 15 to 25m². Correct pile when finished. Replace furniture onto Craftex Foil Furniture Protectors (0121).

CLASSIFICATION

Aqueous blend of cleaning agents, bactericide and fluorochemicals. pH 7.

Size: 5L
Product Code: 0076
