

**TT6650**

*The TT6650 cable machine is a genuine workhorse providing a truly cost effective answer to big area floor maintenance.*

First and foremost the user will find the TT6650 as easy to use as our smaller machines with the control and operation systems

to exactly the same specification, it handles like a dream.

Big capacity polyform tanks provide a full 60-litre capacity to match the exceptionally stable 65cm single brush scrubbing head, complemented by an oversized, floating 1054mm semi-parabolic aluminium floor tool.

The motor and power transmission design is one of the best; well and truly time tested over the years and the vacuum motor system is nothing less than our superb TwinFlo' bypass unit. You really do end up with clean, dry floors.

**Brush / Pad Selection**

Our full range of machines is complemented by an extensive range of brush specifications in order to ensure the highest standards and optimum results in use and floors you will be proud of.

**Brushes and Pad Drives in 35/45/55 and 65cm**

**45/55/65cm** Heavy duty scrubbing brush

**35cm** Long life cylinder brush  
**35cm** Nyloscrub cylinder brush

**45/55/65cm** Light duty scrubbing brush

**45/55/65cm** Long life heavy duty scrubbing brush

**40/50/60cm** PadLoc pad drive system

Cable/Electric Models

**Twintec you won't find better**

# TwinTec Cable

The original TwinTec concept of providing two primary technologies in a single product is as meaningful today as it has always been.

## TT1530, TT3035

Designed to be compact, easy to operate and exceptionally manoeuvrable when in use, whilst the oversized transit wheels allow easy movement to and from any specific locations. The cylinder power brush ensures deep cleaning performance, whilst the twin water pickup nozzles permit multidirectional operation which is vitally important when cleaning narrow walkways often found in shops and food stores. You can walk in forwards and reverse out without turning and without loss of scrubbing and drying performance.

TT1530

TT3035

# The best just gets better and better

## TT4045

The outstanding specification of the cable TwinTec machines is, without doubt, to the highest standard both in terms of design and equally in terms of performance.

The big advantage of cable machines is the amazing power provided by mains operation, three times that of battery machines, and, due to the lack of costly batteries and 24V components, the machines are truly cost effective, almost two for the price of one.

The stainless steel chassis, Structofoam brush housing, aluminium floor tools and polyform tanks are second to none, whilst such features as the tilting brush deck, fully adjustable control handle and FlexiFill system, all add to maximize the user friendly facilities.

Aluminium floor tool

## TT4055

When selecting a scrubber dryer machine the area that needs to be cleaned and the time available to clean it will determine the preferred size of the brush system.

Care must be taken, however, to ensure that bigger is better but not too big, taking into account the obstructions that must be navigated during the daily cleaning cycle.

The TT4055 has masterful performance moving under its own brush power with amazing speed and purpose, yet in an overall size very little bigger and equally convenient as the 45cm model.
